

Carbomer 941 Parameter Specifications

Packing specification: 20kg/carton

Properties: (jelly type) very short rheology, high viscosity, high transparency, low ionic resistance, low shear resistance, high yield value (suspending capacity)

Solubility: Soluble in water, glycerol and ethanol, etc.

Safety: no mold growth in dry state, non-toxic and non-irritating

Validity: Two years

Storage conditions: sealed at room temperature, avoid direct exposure to air and sunlight
