bucket

MOPS
powder

MOPS Parameter Specifications

Name: 3-Morpholinopropanesulfonic acid

Abbreviation: MOPS

CAS#1132-61-2

Molecular mass: 209.26

Molecular Formula: C7H15NO4S

Appearance and shape: white powder

Density: 1.298

Melting point: 277-282° C

Refractive index: 1512

Flash point: 116° C

Packing specification: 25kg/barrel (other packaging can also be customized)

Storage conditions: room temperature, protected from light and moisture
